Abstract (en)

[origin: DE19600397C1] The invention relates to a method of making non-perishable baked items from a cake mixture, wherein a cake tin (1) is filled with the cake mixture, the cake tin is closed by a lid and the cake mixture is heated together with the cake tin with closed lid (2), wherein the resulting gases are released, the cake mixture is cooled together with the cake tin, and a vacuum, sealing the cake tin in an air-tight manner by means of the lid without additional aid, is generated inside the cake tin as a result of the cooling of the baked item, characterised in that negative pressure in the range from 0.3 to 0.5 bar is produced in the completely cooled cake tin.
