Abstract (en)

Assembly for mounting a casing (1) in a wall (20), comprising two substantially U-shaped profiles (2), having legs (9, 10) enclosing the wall and being provided with flanged edge portions (13) that are clamped onto the wall by some clamping brackets (19). A sunk portion (14) having its bottom provided with slots (18) is provided in the one leg (10). A corner cap (3) provided with recessions for receiving the upper transom (4) is mounted on the upper end (49) of the profile (2). Means (42) for supporting the upper transom and the corner cap through the profile cooperate with the slots (18) in the profile (2) in such a way that these parts are pushed from the profile (2) upwards against the ceiling. A lift-off hinge (5) can be fittingly received in a sunk portion (14). <IMAGE>
