Abstract (en)
[origin: EP0787882A2] The door panels (1,2) have frame profiles (3,4) which are also at the inner side of the panels with a narrow spacing gap. One profile (5) has a passage opening (19), parallel to the edge, for a hinge axis (20). A free section, at a gap from the hinge axis and passage opening, gives the room for the suspension of the second frame profile (3) with the fitted hinge strips (22,23).
