Abstract (en)  
[origin: EP0787955A2] The cladding has a horizontal holding bar (6,7) for its front plate (2), at the rear side (5) at the upper and lower edges and at a gap from the rear surface. Cut-outs (13,21) give mounting points for U-shaped mounting hooks (15,22) for clamping at the upper and lower edges (16,23) of the radiator body (1). Vertical holding bars (8) are the edges of the front plate, at a gap from the rear surface, with a support hook (36) and tongue structure to lock into the bent leading edges of its side panels (3). The upper holding bar (6) has holes to take the inserted lateral rods (31) of the top covering grid (4). The upper edge of the side panels has a hook clamp to grip behind the end lateral rods of the covering grid.
