Abstract (en)

[origin: WO9514780A2] Human monoclonal antibodies against a human cytokine (such as a human interleukin, e.g., human IL-1 alpha ) and fragments of such antibodies are disclosed, together with pharmaceutical compositions and methods employing the human monoclonal antibodies and fragments, methods for screening for human monoclonal antibodies against a human protein, methods for producing a cDNA library enriched in DNA encoding VH and/or VL chains of a human monoclonal antibody, cell lines for making the human monoclonal antibodies, and isolated DNA for making the human monoclonal antibodies and fragments of the invention.
