Abstract (en)

[origin: EP0788762A1] The water-drainage pressure applicator (7) and a pressure application unit (15) are concavely shaped facing each other and have interfitting holes (19) or tines (18). An operating lever (10) and pressure application unit are in the form of a single-armed lever containing a cam (21) for connecting it to the pressure unit. The squeezer consists of a base frame (2) for adapting onto a container (1). The operating lever is mounted on the transition (9) between the base frame and the pressure applicator and unit.
