Abstract (en)
Waste collection device comprising a housing which is substantially closed in normal conditions of use and which comprises a base (2) having connected thereto a standing wall (4,5) closable in peripheral direction, a cover (7) and at least one inlet (9) for waste and a waste container (1) open at its top which is placeable in the housing below the level of the inlet in a manner such that the inlet debouches above the waste container, wherein the wall comprises two mutually opposite posts (5) standing from an edge zone of the base, which posts are mutually connected at their top by a girder (6) which supports the cover, wherein at least one door (4) for closing a passage for the waste container is suspended from a post and is provided on its outside with holders (16,17,18) in which a board with a text or an image can be pushed and wherein a filler body (12,14) is provided for filling empty space in the housing extending beyond the mouth of the inlet above the waste container. <IMAGE>
