Abstract (en)
[origin: DE19532098A1] A device for endoscopic examinations and/or operations is disclosed with a framework on which one or several holding, connecting and/or receiving means for locking and/or spreading elements, lighting means, liquid and/or gas suction means, examination and/or surgical instruments may be arranged and/or detachably secured. Also disclosed are tongue and labial commissure retaining spatulas, palatal plates, lighting and receiving means for other devices and/or instruments that may be mounted on said device.
