Abstract (en)  
[origin: WO9614251A1] A plastic transport container (10) is intended for the simultaneous transport of a plurality of disc-like components (30), especially tin lids for the foodstuffs industry. The transport container has a base (11) and side walls (12) projecting therefrom and divisions inside the container for a plurality of storage compartments (13) for stacks of disc-like components arranged perpendicularly side-by-side. The storage compartments (13) are bordered on two sides by stack support devices (14) having apertures (15) for the insertion of gripping components to take the stacks into and out of the compartments.
