Abstract (en)
[origin: EP0790345A2] A suspending equipment having an arm provided with engaging members for suspending washed clothes or the like such that the arm can be connected to a selected position corresponding to the attachment attitude of an attaching member and the engaging members can be ejected/retracted to and from the arm so that the size of the suspending equipment is reduced to be suitable for use in a room and the suspending equipment can be easily and compactly accommodated without a necessity of a large space when the same is not used. <IMAGE>
