Abstract (en)

[origin: EP0790363A2] The system comprises a bar holder (3) having a known guide bar (24) and at least one pintle (25) for releasably joining of the post (1) and bar (2), which is fixed with the post in the bar, in front of the fastening of the bar. A known carrying element is joined as a multi functional glazing carrier (8) outside on the post with the bar holders, and has an adjustable seating width. A fastening element has a guide sleeve for a self-tapping screw working together with a pressure distance sleeve (19) for a known holding strip. The bar has a long hole in an extended catch-like profile for the fixing and displacement of the bar holder, through which a mounting screw (4) is insertable in a tapped hole of the guide bar. The length of the long hole is larger than plug-in depth of the bar holder in the post.
