Abstract (en)
[origin: EP0790376A2] The closure has a key-operated main lock (6) on the casement side and having a main bolt (13) whereby after operating the main lock into the closing position together with the main bolt (13) the locking bolt (8) of the additional lock (7) is locked forward operated by the drive rod (14). After a first return closing operation of the main lock the main bolt is closed back and after a second return closing operation the locking bolt is closed back. A coupling can be arranged in the additional lock to uncouple the locking bolt during the first forward closing operation from the lock operation. The coupling has detent to hold the locking bolt in the forward closed position.
