Abstract (en)

[origin: WO9615042A1] A package (1) made by the deep drawing method, comprising a container part (2) and a lid (3). The edges of the lid (3) and the container part (2) are designed so that the inner wall (3a) of the edge of the lid (3) is tightly against inner wall (2a) of the edge of the container part (2), and correspondingly, the outer wall (3b) of the edge of the lid (3) is tightly against the outer wall (2b) of the edge of the container part (2). Curved parts (2c, 3c) are arranged on the outer walls (2b, 3b), said curved parts locking the lid (3) into the container part (2) and sealing the seam between the lid (3) and the container part (2), so that the package (1) may also be used for storing strong-odoured and liquid substances.
