Abstract (en)
A golf putter (111) has a shaft (112), a head (114) and a spring stick part (115A) between the shaft and the head. When a player hits a ball with the putter, the spring stick part of the putter is elastically bent by the inertia of the head in the stroke to hit said ball and said head of the putter is corrected by the inertia of the head and the elastic recovery of the spring stick part so as to move along a straight line. <IMAGE>
