Abstract (en)

[origin: EP0791906A1] The control method for controlling the traffic flow within a defined area, e.g. a city centre, involves monitoring and displaying the car parking availability of the public car parks (2), for regulating traffic access to the defined area. The parking is managed via a database, communicating with vehicles having a reserved parking space or authorised access, allowed access upon verification of the reserved parking space or access authorisation.
