Abstract (en)
[origin: EP0792606A2] The shelving comprises at least one support stand (2) formed from at least two telescopic elements (7,8) which can be fixed in position relative to each other and which can be locked in the different positions by a support bar (3) which extends at least in part through these elements and supports the shelf. The elements for the support stand are tubular in cross-section and fit into each other. They have openings (10,11) which can be brought into alignment for passing through the support bars. The elements can have a rectangular hollow box section.
