Abstract (en)

[origin: EP0792803A1] A method and machine (1) for overwrapping products (2) in sheets (3) of thermoplastic material, whereby each product (2) is fed continuously, together with a respective sheet (3) of overwrapping material, along a given path, an initial portion (17) of which is a folding portion along which the sheet (3) is folded about the product (2), a final portion (19) of which is a stabilizing and heat-sealing portion along which the sheet (3) is stabilized in the folded configuration, and an intermediate portion (18) of which is a preheating portion along which the sheet (3) is at least partly preheated to a temperature close to a softening temperature. <IMAGE>
