Abstract (en)

Packing machine, particularly for cigarettes, or similar, comprising: a station (A) for combination of a wrapping slip (F) with an orderly group (G) of cigarettes (S); a forming unit (5) by means of which the wrapping slip (F) is picked up from the combining station (A) together with the group (G) of cigarettes (S) and wrapped around the latter and with at least one movable forming compartment (6) with the entry aperture coinciding with the combining station (A); means (1, 2, 3, 4) for feeding a sequence of orderly groups (G) of cigarettes (S) to the combining station (A); means (T, 5, 18) for feeding a sequence of slips (F) to the combining station (A) and means (5) for positioning them between the orderly group (G) of cigarettes (S) and the corresponding compartment (6) of the forming unit (5). According to the invention, the means for positioning the slip (F) into the station (A) for its combination with the group (G) of cigarettes (S) are made of or integrated to the forming unit (5) itself. <IMAGE>
