Abstract (en)
[origin: DE19607684C1] The door opener (2) has a switching element (6) associated with an armature (8) and a magnetic coil (13) and displaced for opening or closing a door opener latch (4). The door opener can be switched between a rest current type and a working current type via a rotary stop (10) cooperating with the armature to limit its movement dependent on the required operating mode.
