Abstract (en)

[origin: US5857872A] A connector assembly for mounting a coaxial plug to a coaxial cable includes a contacting ferrule which on one hand engages a cable conductor corrugated tube by means of threads, and on the other hand is connected to the housing of the coaxial plug. The connector is configured in such a manner that at its plug-side end the contacting ferrule constitutes a collet having resilient segments and evincing a conical compression surface which is subject to radial compression against the cable conductor corrugated tube by a plug-side, cooperating compression cone.
