Abstract (en)

[origin: WO9614809A1] According to the invention, said implant (2) has a general U shape, in other words it is comprised of two side blades (10) connected to each other at one end by means of a heel (11), at least one of said blades being provided with a cutting edge (12) at its free end, the implant (2) being conformed so that it provides for the taking of a monoblock bone graft (16).
