Abstract (en)
[origin: WO9615902A2] The proposal is for a process for producing cartons from a sheet of paper, cardboard, pasteboard or plastic and a folding blank for implementing the process, in which the outside dimensions of the object to be packed are found and fed into a computer. The computer calculates the positions of the lines for a folding blank (1, 20, 46) for a folded carton in which the carton is double-walled and protects the packed object from dust and damage.
