Abstract (en)

[origin: WO9616830A1] A driver alertness monitor for measuring time taken by a driver to react to a stimulus generated while driving and comparing the measurement with a standard thereby to indicate the state of alertness of the driver also includes means for initially calibrating reaction time of the driver when in a state of alertness and a detailed control means for deciding when to test the driver during a journey and how to interpret and inform the driver of the results.
