Abstract (en)

[origin: WO9616894A1] Apparatus (Figs. 2, 3) for use with a beverage tap (1) to perform a random selection or game function is disclosed. A triggering means (11) is included for providing an actuation signal (12A, 12B) in response to operation of the beverage tap (1). A random number generator means (13) is coupled to said triggering means (11) for generating a random value in response to a predetermined number of occurrences of the actuation signal (12A, 12B), the random number generator means (13) being further coupled to display means (10) for outputting one or more symbols (10A, 10B, 10C) in response to said random value.
