Abstract (en)

[origin: WO9617122A1] Electric steam iron comprising a hot part (1) having a sole (7) and a vaporization chamber (4), said hot part (1) of the iron being subdivided into at least two thermal zones (A, A', B, C), each of them being provided with a heating element (11, 13, 20) and associated to a regulation means (12, 14, 21). According to the invention, the hot part has two thermal zones; a first zone (A) comprises at least one surface corresponding substantially to the vaporization chamber (4) and a second zone (B) comprises at least a surface corresponding substantially to the portion of the sole situated under the chamber (4).
