Abstract (en)
[origin: EP0794400A2] At least one arm (2,3) has an H-shaped cross-section which has at least one ridge (15) protruding above the fixture surface welding it to the second arm (4-12). The first arm has at least two ridges forming a groove between them for the second arm which has a rectangular cross section. The fixture surface runs across, especially at right angles to the surface holding the objects. All the ends of the second arms end at the first arms where they are joined together.
