Abstract (en)
[origin: EP0881716A2] The socket includes a screening casing (20) which consists of several conductive elements (22, 30, 40), at least one plug socket (50) with a screening (52), and conducting connections arranged between the elements of the screen casing and the screening of the plug socket. All elements of the casing are coupled movable and electrically conducting with each other, and are firmly connectable with each other through a connecting arrangement (48a, 48b) in an installation position, in which the casing is closed, and the socket is prepared for the installation.
