Abstract (en)
[origin: WO9616811A1] In a method of cleaning screen printing frames, wherein the frame is contacted with a cleaning liquid which is capable of dissolving or washing out ink residues present in and/or on the screen fabric, and wherein cleaning liquid present in the screen fabric after dissolution of the ink residues is removed, environmental problems are avoided in that the removal of the cleaning liquid takes place by entraining it in a gas flow, and then the entrained liquid is preferably separated from the gas flow.
