Abstract (en)
The pivoting grip of a receptacle can be displaced vertically when in the carrying position, in order to lock itself in this position with respect to the receptacle. This is achieved by positive and negative locking elements (22,11,12) on the grip and on the receptacle, which become engaged with one another. The receptacle may have a bearing support (10), and the grip may have a connecting element (20) in the region of the support. The support and the element may also have positive and negative locking elements. The connecting element may have two webs (21), which surround the support like a clip.

Abstract (de)
Verschwenkbarer Griff eines Transportgefäßes, zum Beispiel eines Korbes oder eines Eimers, wobei der Griff (2) in aufgestellte Position zur Arretierung vertikal auslenkbar ist, und wobei hierbei am Gefäß (1) und am Griff (2) positive und negative Rastelemente (22 und 11, 12) ineinandergreifen. <IMAGE>
