Abstract (en)  
[origin: WO9617730A1] A system for binding printed works consisting of sheets each comprising a first portion for reading and a second portion for binding. Binding is achieved by clamping all the second sheet portions between two reinforcing strips (7). The first portion of each sheet comprises a data medium (2) with a coating material (5) on both sides thereof forming a data-medium-free strip (3) having a reduced thickness (2E) relative to the first sheet portion, and a predetermined width (D) that is greater than the width (d) of the reinforcing strips (7).
