Abstract (en)

[origin: WO9617772A1] In a method of filling a packaging container (11, 11', 11'', 11'''), a liquid is charged in a container through an opening in a top end (11a) of the container to a first level below the top end of the container. The container has a deformable portion (P1, 14', 14'') in a wall thereof so that an inside volume of the container can be adjusted. A lid is sealed on the opening. The deformable portion of the container is deformed to elevate the liquid above the first level.
