Abstract (en)
[origin: EP0796791A1] The procedure, consists of folding the gloves (3) in half, if necessary together with a liner (4), with the aid of a rigid frame (1) which has a straight lower edge and a ring at the top for suspending it. During operation the frame pushes the gloves through a slot (61) in a panel (6), and into a hollow tube (7) underneath onto which an open packaging sleeve has been fitted. The tube is on a carousel (8) with a horizontal axis which passes each sleeve after filling onto a conveyor (91) prior to sealing.
