Abstract (en)  
[origin: EP0796812A1] An automatic winding machine for simultaneously winding a plurality of yarn batches to be fed to separate stations (12) of the winding machine, in which the packages (2) are carried by transporting caddies (1) each identified by its own code which distinguishes it from all other caddies, the code being associated with the identification of the type of package loaded onto it, the winding stations being provided with code readers (39) to identify the caddy in transit and hence its package batch. <IMAGE>
