Abstract (en)

A device for forming a covering for a wall, floor or ceiling, which device comprises a support construction(1) formed by profiles and provided with a mounting surface and two or more panels (10,11) of suitable material, wherein the panel (11) is provided on the side facing toward the support construction (1) with a connecting means and the mounting surface is provided with a co-acting connecting means, wherein the connecting means are embodied as mushroom-fastening tape (12,13) which can be adhered to the panel (10,11) on the one hand and to the mounting surface of the support construction (1) on the other so that the wall panels (10,11) fit closely together in a non-stepped manner. <IMAGE>
