Abstract (en)

The swimming pool shelter comprises a rigid greenhouse type structure formed by several adjacent arches (1) at least one of which can slide. A central inverted U beam (5) supports each half arch (3g,3d,1g,1d). The beam serves as a bearing track for sliding half arches (2g,2d,4g,4d) and support for a ventilation casing and electrical supply cables supports. The sliding arches fit inside fixed arches (1g,1d,3g,3d) and watertight brushes are located on each fixed arch. A watertight brush parallel to the top of the sliding arch seals the bearing track. Each sliding arch is equipped with a pair of sliding bearings and a pair of guide bearings.

Abstract (fr)

La présente invention concerne un abri pour piscine constitué d'une structure rigide de type serre ou véranda en forme de plusieurs voûtes cintrées ou à pans coupés adjacentes (1, 2, 3, 4) dont au moins une (2, 4) est coulissante, caractérisé en ce qu'une poutre (5) centrale en forme de U inversé supporte chaque demi-voûte (3g, 3d, 1g, 1d), ladite poutre (5) servant de chemin de roulement pour les demi-voûtes coulissantes (2g, 2d, 4g, 4d), de support pour une gaine de ventilation (6) et de gaine ou de support de passage des câbles (571) d'alimentation électrique. <IMAGE>
