Abstract (en)

[origin: EP0796976A2] The truck (9) supports a movable heavy bar for pulling down a shade in a greenhouse. It works via two rollers in the guide rail for the shade, and hinges in relation to the profiled bar. The hinge can be formed by a bush (3) mounted in the truck between the bearings for the two rollers (2,5). An angular support can be provided, forming an insertion aid.
