Abstract (en)

A process for applying a length of aluminum sheet to the outer surface (2) of a refrigerating container (1), by using a metal ribbon and a layer of adhesive applied between said aluminum ribbon (10) and said refrigerating container (1), pressing said ribbon against the surface (2) of the refrigerating container (1) and cutting (7) the desired length of the ribbon (10), The adhesive (8, 28, 29) can be incorporated in a composite ribbon (10), or directly deposited over the refrigerating container (1), or over an intermediate support (22). <IMAGE>
