Abstract (en)

[origin: WO9618468A1] In a grid, in particular a flat grid (grating) made of metal (such as expanded metal), paper, cardboard or plastic, the grid nodes (1) are interconnected by crossbars (2) that extend as the rays of a star between adjacent grid nodes. The crossbars (2) are corrugated or accordion creased between the grid nodes (1), so that the distance between the nodes (1) may be increased or decreased when outer forces are applied on the grid.
