Abstract (en)

Integral helmet for motorcyclists, racing-motorists and the like provided with a device for opening-closing the chin protector, comprising a cap (2), a visor (8) and a chin-protector (3) openable by raising the same with a rotatory-translatory motion according to a substantially elliptic trajectory, which provides for a forwards movement at the start of the raising, so as to release it from the cap (2), and a subsequent backwards movement, so as to cause it to substantially mate, in position of complete opening, the top of the cap (2). <IMAGE>
