Abstract (en)

[origin: EP0798062A2] A metal foam component (1), in the form of a car body element includes a foamed porous layer made up of a metal powder and a foaming agent. The component has at least one contour (1') which is raised out of its plane (1''). The angles in the transition zones of the three-dimensionally formed component lie within the range between 100 and 180 degrees. Also claimed are a method and an apparatus for producing such a component.
