Abstract (en)  
[origin: EP0798754A2] An electromagnetic relay in which electrically conducting bars (14,15,18,19) extend along the inner surface of a cover-housing and are retained in place by means of fixture sections. Each bar is joined on one side to a terminal-lug (16,17,20,21) jutting out from the outer surface of the cover-housing, and on the other side forms a plug-connection element (24) within the interior of the cover housing.
