Abstract (en)  
[origin: EP0798951A2] The converter housing (10) has a base part receiving the electronic components and a termination element (14) with a cable guide (46) for reception of at least one electrical connection cable. The base part and the termination element are positioned vertically relative to one another, with the base part having a rounded end face (18) on the opposite side to the termination element, with one of the planar faces (22) of the base part lying in a common plane with the corresponding surface of the termination element.
