Abstract (en)

A clip comprises an L-shaped lever 8 journaled in side walls 6 to pivot freely. One leg 14 traps material 24 against a rear wall 4 as the clip moves to an over-centre position. This arrangement is used in known strap adjusters. Slots 22 are provided in the side walls, between the axis of rotation of the lever and the rear wall 4, so that the clip can be attached to the edge of a wide piece of material. The clip is particularly suitable for use in attaching an infant soother to a garment, via a strap. <IMAGE>
