Abstract (en)

[origin: EP0799596A1] The system comprises a cylindrical support (1) covered by an absorbent cover (2). A cylindrical handle (3) is perpendicular to the support. The support has a conduit (4) with several holes (6) capable of distributing a mixture of water and detergent along the cover. The conduit in the tubular support has inside a filling material (10) defining the conduit a central inlet channel (11). The handle has a pump (8) connected at one end to the conduit and at the other end, only during pumping, to a portable reservoir (9) containing the liquid.
