Abstract (en)

[origin: EP0801161A1] Shed forming device for a textile machine, provided with at least one shed forming mechanism comprising, a movable shed forming means (19) working together with a pulley element (15), a selection device (4-9, 12) for holding the shed forming means (19) at a fixed height, and a lifting device (22) for moving the shed forming means (19) up and down when it is not held at a fixed height, and provided with a selection module (1) made as a separate unit, which comprises the selection device (4-9,12), and which is detachably attached to a pulley module (13). The pulley module (13) comprises the pulley element (15) and the shed forming means (19) and is itself also detachably attached to a part of the shed forming device. <IMAGE>
