Abstract (en)

[origin: EP0801178A2] The adjustment pipe in the area of the overflow aperture supports a cover cap (16) and is equipped on the outside with sealing components (18) and stops (17) constituting the end positions. The adjustment pipe (15) in relation to the immersion pipe (7) and cover cap is rotatably formed and has a screw or spiral-shaped guide (20) available, together with the immersion pipe. The guide is formed as a spirally running groove (21) formed in the adjustment pipe and guide pins (22) provided in the immersion pipe. Several grooves (21,23) and guide pins, preferably a second groove and a second guide pin are provided.
