Abstract (en)
[origin: EP0801284A2] A formation (1) is firmly connected with the closure or closure support and penetrates upwards a longitudinal slot formed on the upper side of the weapon housing. An elongated loading lever (4) is pivotable from a longitudinal position, in which it extends in the longitudinal direction of the weapon, to both sides and is fitted with its one end on the formation. A set-back component (3) is provided for guiding back the pivoted loading lever into its longitudinal position. A securing device (8,8') is provided for the loading lever in each of its end positions. A bearing pin (5) is arranged on the loading lever or on a longitudinal strip and stands outwards and upwards.
