Abstract (en)
[origin: WO9621606A1] A device for storing liquid, in particular aggressive liquid, which consists of a closable container (1) provided with at least one opening (5) for filling and/or draining purposes, wherein a second container (6) is arranged around the closable container (1) with a filling capacity equal to that of the closable container (1) and with a height smaller than that of the closable container (1), which second container (6) is provided with means for transporting the assembly (7, 8, 9), so that when the first container (1) springs a leak the liquid can be collected in the second container (6), while the printing on the first container (1) relating to the content thereof still remains visible.
