Abstract (en)

[origin: EP0802277A2] The drying stage for a fibre web, in a papermaking or cardboard prodn. machine, has a number of drying cylinders and web guide suction rollers (11,13), with an external suction box (27,29) for pref. all the guide rollers (11,13). The guide roller mantle (31) has a number of passage holes (37) where some, and pref. all open into external grooves (35) at the outer surface (33) of the mantle (31). Also claimed is a drying stage operation where at least one groove (35) is fitted externally in the mantle (31) of the suction guide roller (11,13). Passage openings (37) are fitted to the groove. The roller (11,13) acts with an external suction box (27,29).
