Abstract (en)

[origin: EP0802471A2] The contact system (5) is of an electric and/or electronic type. The contact system or systems are arranged in the rear side section (19) esp. in the edge region of the indicating unit (1). The contact systems are operable by a manually directed force, operationally specific, on the indicating unit or the mask (7). The indicating unit or the mask can be designed right angular. The indicating unit or the mask is esp. centrally located, and can be swivelled esp. towards each of the four sides (3). The indicating unit or the mask can be designed circular and can be tilted concentrically to their circumference.
